This chart is designed to be printed and utilized as a reference guide for your doggie shoe size.

Print this page and place it on a firm, flat surface

Place your doggie paw on the chart starting at the far left.

The WIDTH of the paw is the important measurement you need. With your doggie standing on the chart, line up the dog's paw from the far left of the chart and simply examine the right distance of the width of the paw length. This will indicate the proper size for your pet.

Check your printed chart with a ruler to ensure measurements are to scale. The numbers on the top of the chart represent inches.
